

Ivandro Neto

Experienced software engineer dedicated to crafting engaging digital experiences that drive impact and elevate user satisfaction.

Relevant Experience

2025

Senior Backend Engineer - Ucall

Spearheaded backend development initiatives, focusing on performance optimization and system scalability. Designed and implemented high-performance RESTful and GraphQL APIs, enhancing data efficiency and reducing response times. Led integrations with Redis and RabbitMQ to improve real-time processing and messaging reliability. Worked closely with frontend and DevOps teams to ensure seamless deployment, security, and maintainability of services.

2023 - 2025

Mid-Level Software Developer - RisingSystems

Developed and maintained robust software solutions, optimizing application performance using C#, .NET Core, and SQL Server. Engineered scalable backends to support high-traffic systems, improving database efficiency and query performance. Collaborated cross-functionally to align software architecture with business goals, ensuring high availability and security standards. Contributed to system refactoring, reducing technical debt and enhancing maintainability.

2023 - 2024

Mid-Level Frontend Developer - SPACIUM

Designed and developed high-performance, scalable frontend applications using Next.js, TypeScript, and Tailwind CSS. Created intuitive and responsive UIs that improved user engagement and accessibility. Worked closely with backend and UX/UI teams to integrate APIs seamlessly, ensuring optimal performance and a smooth user experience. Led optimizations that improved page load speeds and overall system responsiveness.

2020 - 2022

Junior Full Stack Developer - Freelance

Developed end-to-end web applications for startups, handling both frontend and backend development with React, Node.js, and PostgreSQL. Designed and deployed scalable architectures that supported business growth and operational efficiency. Focused on enhancing user engagement through responsive UI/UX improvements and performance optimizations. Delivered tailored solutions that aligned with client needs, ensuring high-impact results and long-term maintainability.

Interests

Chess, Photography, Reading, Quality Time with Family & Friends, Mortal Kombat

Skills

Programming Languages

C#, TypeScript, JavaScript, C, C++, Java

Frameworks & Libraries

Next.js, React, Angular, Tailwind CSS, .NET Core, Node.js, Express.js, GraphQL API, RESTful API, Unity, Godot, SFML

Tools & Platforms

SQL Server, MongoDB, MySQL, PostgreSQL, SQLite, Redis, RabbitMQ

Education

Computer Engineering

ISPTEC

Selected Projects

Custom & Log Solutions

An Angolan logistics company specializing in import/export operations. We connect origin and destination customs offices with efficiency, transparency, and competitive pricing, ensuring seamless logistics solutions.

In.orbit

A goal-tracking app designed to boost productivity. Users can set weekly objectives, monitor progress, and manage tasks efficiently through an intuitive and engaging interface.

SPACIUM

A business incubator supporting startups with mentorship, networking, and funding opportunities. Spacium fosters innovation and helps new ventures grow from idea to market presence.
